Subject: Postpone agency compliance with vendor standard name for procurement vendors

DPS and DOA made a decision together to postpone the implementation of agency compliance with the vendor standard name.

After looking at the entire process, we decided that there are still decisions to be made regarding eVA and CARS that will impact agencies. DPS and DOA need to work through these issues to ensure a smooth transition.

DPS and DOA will work together on the goal of having final documentation to the agencies by January 1, 2012 of the required changes for vendor standard name. Then we will work with you to establish a realistic schedule, including agency testing time, for implementation.

DPS plans on implementing the changes to add two new fields to the requisition header, fields 5 and 6, at the end of December 2011. Final plans for the order import/export record layout and exact implementation date will be emailed to the group shortly.

Thank you.

Marion Lancaster
eVA Technical Project Manager
